NEW YORK

Small production, big results

Whether the Finger Lakes, Long Island, Hudson Valley or beyond, the best wines in New York are still made by small, typically family-owned wineries with limited technological shortcuts and in miniscule volume.

To put production figures into perspective, rising stars in the Finger Lakes like Nathan Kendall make less than 4,000 cases a year. The regional heavyweight, Hermann J. Wiemer, produces about 17,000 cases annually. Yet even combined, these efforts are hardly a drop in the bucket when compared to large-scale American producers who make upward of 10 million cases a year.

While great wines can be made many ways, there's distinct value in wines made carefully in small quantities, directly reflecting the terroir, vintage and philosophies of their makers. Winemaker Fred Merwath's Rieslings at Hermann J. Wiemer reveal both the filigreed effect of grapes coaxed from a cool

vintage as well as the plump nectar of an Indian summer. You can taste the complexity gained from patient lees aging in Nathan Kendall's Chardonnay or the nuanced texture of Pinot Noir made without correction via fining agents.

As this month's batch of reviews show,

Often priced under \$20 at entry level, these wines represent a breed of painstakingly made, small-production pours that offer remarkable value.

wines from New York offer a dizzying array of diversity. Classics like Riesling and Merlot are featured alongside fine sparkling wines and rarities like Gamay and Grüner Veltliner. Often priced under \$20 at entry level, these wines represent a breed of painstakingly made, small-production pours that provide remarkable value.

Call it cliché, but we value wine because it offers something unique: a time capsule

expressive of a singular terroir or vintage. You can taste the struggle and the glory. It connects you to the hearts of the people and places that crafted it, and only further enhances your drinking experience. We'll toast to that.

Cheers!

The Wine Enthusiast Buying Guide

The Buying Guide includes ratings and reviews of new-release and selected older beverage alcohol products evaluated by *Wine Enthusiast Magazine's* editors and other qualified tasters. Regular contributors to our Buying Guide include Managing Editor/Tasting Director Lauren Buzzeo, Executive Editor Susan Kostrzewa, Tasting Manager Alexander Peartree, Senior Tasting Coordinator Fiona Adams, Tasting Coordinator Carrie Dykes, Contributing Editors Michael Schachner, Anna Lee C. Iijima, Christina Pickard, Mike DeSimone, Jeff Jensen and Spirits Editor Kara Newman in New York; European Editor Roger Voss in France; Italian Editor Kerin O'Keefe in Switzerland; Contributing Editor Anne Krebiehl in England; Contributing Editors Virginie Boone, Jim Gordon and Matt Kettmann in California; and Contributing Editors Paul Gregutt and Sean Sullivan in Washington.

If a wine was evaluated by a single reviewer, that taster's initials appear following the note. When no initials appear following a wine review, the wine was evaluated by two or more reviewers and the score and tasting note reflect the input of all tasters. Unless otherwise stated, all spirit reviews are by Kara Newman and all beer reviews are by Lauren Buzzeo.

Each review contains a score, the full name of the product, its suggested national retail price, its alcohol (abv) as reported to us by the submitter and a tasting note. If price or alcohol content cannot be confirmed, NA (not available) will be printed. Prices are for 750-ml bottles unless otherwise indicated.

TASTING METHODOLOGY AND GOALS

All tastings reported in the Buying Guide are performed blind. Typically, products are tasted in peer-group flights of from 5–8 samples. Reviewers may know general information about a flight to provide context—vintage, variety or appellation—but never the producer or retail price of any given selection. When possible, products considered flawed or uncustomary are retasted.

ABOUT THE SCORES

Ratings reflect what our editors felt about a particular product. Beyond the rating, we encourage you to read the accompanying tasting note to learn about a product's special characteristics.

- Classic 98–100:** The pinnacle of quality.
- Superb 94–97:** A great achievement.
- Excellent 90–93:** Highly recommended.
- Very Good 87–89:** Often good value; well recommended.
- Good 83–86:** Suitable for everyday consumption; often good value.
- Acceptable 80–82:** Can be employed in casual, less-critical circumstances.

Products deemed Unacceptable (receiving a rating below 80 points) are not reviewed.

SPECIAL DESIGNATIONS

Editors' Choice products are those that offer excellent quality at a price above our Best Buy range, or a product at any price with unique qualities that merit special attention.

Cellar Selections are products deemed highly collectible and/or requiring time in a temperature-controlled wine cellar to reach their maximum potential. A Cellar Selection designation does not mean that a product must be stored to be enjoyed, but that cellaring will probably result in a more enjoyable bottle. In general, an optimum time for cellaring will be indicated.

Best Buys are products that offer a high level of quality in relation to price. Wines meriting this award are generally priced at \$15 or less, and are designated Best Buys after surpassing a specific quality-to-price ratio benchmark.

SPIRITS

Berry-based fruit liqueurs

Berry-based liqueurs don't often get the respect they deserve. For many years, they weren't regarded as much more than sticky sweets—perhaps poured into a tiny cordial glass at dessert time—since it was hard to stomach more than an ounce or two of the stuff. Today, spirits producers are emphasizing the character of the fruit itself; some are even dialing back on the sugar—a welcome change.

Two particular bottlings reviewed in this issue merit a shout-out as examples of the direction fruit liqueurs are capable of taking. The first is St. George's Raspberry Liqueur, which is barely sweet at all. It's made with a mix of raspberry brandy and raspberry juice, and has a surprising sour cherry and lemon curd-like acidity that sets the mouth watering.

Another bottle worth a second look is the Black Trumpet Blueberry Cordial made by New Hampshire's Tamworth Distilling. In addition to luscious dark fruit, this liqueur takes an intriguing turn thanks to an infusion lavender

Today, spirits producers are emphasizing the character of the fruit itself; some are even dialing back on the sugar.

and lemon verbena, as well as the addition of Black Trumpet mushrooms for a subtle umami swagger that adds complexity and dimension.

Meanwhile, bartenders continue to reach for berry liqueurs to fill out cocktails like the classic Bramble, a cocktail created by Dick Bradsell in 1980s London—basically, a Gin Sour

(London dry gin, lemon juice, simple syrup) laced with good dose of *crème de mûre* (black-berry liqueur) for color and fruity flavor, usually served over crushed ice.

Of course, if that seems too summery, swap in blended Scotch, as bartenders from the Scotch Egg Club did at a recent Tales of the Cocktail event, mixing Dewars 12 with the more

traditional components for a season-spanning sip ideal for bringing fruit liqueurs into the colder-weather months.

On top of the berry-based fruit liqueur reviews, there are also a slew of new vodka reviews covered in this issue.

Cheers!

87 Jahiot Crème de Cassis (France; Heavenly Spirits, Lakeville, MA). This blackcurrant liqueur has a concentrated, inky hue and a mildly herbaceous scent, with not much fruit at all. The palate, however, is laden with sticky-sweet raspberry and stewed blackberry, leading into a moderate finish.

87 Merlet Crème de Cassis (France; Bedford & Grove, Louisville, KY). The fruit-forward aroma leads with luscious dark berry, freshened with a whiff of pine needle. The same powerful flavors are echoed on the bold palate: Lots of sweet-tart fruit, with that hint of pine returning on the finish. Some will find the thick, viscous blackcurrant liqueur a bit much to sip straight up; a little will go a long way in a whiskey cocktail.

BEER

Fall for American Double/Imperial IPAs

With fall in full swing, drinking preferences often trend toward more robust and full-flavored selections than those we typically enjoy during the summer. The holidays are also just around the corner, and family and friends will be gathering, so it's best to be prepared with a fridge stocked full of chilly weather's best friend: Imperial IPAs.

Imperial IPAs are basically India pale ales kicked up to 11—more malts, more alcohol and most importantly, more hops. The result is a complex, strong sipping beer with IBUs, or international bittering units, climbing above 60 and, in some cases, well beyond at upward of 100.

Imperial IPAs are perfect for the season. They lend themselves wonderfully to Thanksgiving fare, especially sweet potatoes, savory stuffing and even turkey—they offer assertive earthy flavors of rich hops and resinous or piny spice, all of which boost the often one-dimensional or bland flavors of the bird. Com-

pared to regular IPAs, the higher alcohol content, richer mouthfeel and amped-up flavor profiles found in Imperial or Double IPAs all complement the traditional American Thanksgiving fare, as well as promising a lively dinner table conversation.

Today's selections—and there are many—are wonderfully varied. In these brews, perhaps more than any other style, the hops are the stars, taking center stage on the nose and palate. Brewers are playing with new hop varieties and ingredient bills to produce the exact final profile they want to achieve, and often list the hops they've used for those who look for selections made with their personal favorites.

For those who might not be pronounced hopheads, non-Imperial IPAs offer the same, albeit dialed-down, earthy spice and moderate astringency, so be sure to have both on hand to satisfy all of your guest's lupulin preferences.

Prost!
